

PROJECT MANAGEMENT

BETTER MANAGE PROJECTS AND YOUR FUTURE!

What does it take to get a new and innovative idea or product from concept to completion? This is what project management is all about – using relevant techniques and strategies to solve specific issues and reach new and defined goals. Helping you gain those skills, from defining project risk to leading project teams to success, is what the Graduate Certificate in Project Management is all about.

GRADUATE CERTIFICATE IN PROJECT MANAGEMENT OFFERED ONLINE.

In this 100 percent online graduate certificate program, you will have the opportunity to explore the essentials of project management. Coursework for your 12-credit-hour program covers risk management, applications in project management, financial tools to manage innovation, and how to build a focused and successful virtual team. These are the insights and skills you could use to implement project management success – from building the right team to managing finances. You could use this graduate certificate program to give your future a project management boost. Or use it as a springboard toward a Master of Science in Project Management and, potentially, future certification as a PMP or CAPM.

Disclaimer: While not designed to fulfill educational requirements for Project Management Professional/Certified Associate in Project Management (PMP/CAPM) designations, this program does offer the project management skills and insights you could use for project leadership roles within your company and your industry.
