

MASTER OF SCIENCE IN BUSINESS INTELLIGENCE AND ANALYTICS

MAKE MORE STRATEGIC DECISIONS WITH A MASTER'S FROM POST UNIVERSITY!

The Master of Science in Business Intelligence and Analytics from Post University could help you develop the skills and insights you could use to guide data-driven decision-making for your organization and your future. In this program, you will have the opportunity to build or hone skills in collecting, cleaning, filtering, and converting raw data into actionable intelligence.

Master of Science in Business Intelligence and Analytics *Offered online and on campus*

In this 36-credit-hour graduate degree program, you will have the opportunity to explore the tools and practices involved in data analytics and business intelligence to better inform decisions that could impact business processes, customer relationships, organizational operations, and company growth. This program covers the technologies used to propose societally responsible strategies based on an analysis of internal and external environments. Coursework also covers how to analyze data and business opportunities and make informed decisions that could impact your company's competitiveness while solving social and business problems.

Note: This program is not eligible for Title IV funding through the U.S. Department of Education.
