

ASSOCIATE OF SCIENCE IN EARLY CHILDHOOD EDUCATION

WORK TOWARD MAKING A DIFFERENCE FOR FUTURE GENERATIONS!

The Associate of Science in Early Childhood Education from Post University could help you make an impact on the educational success of young learners for generations to come. To help you build essential knowledge, skills, and competencies, this program explores the developmental stages and social and emotional needs of children from infancy through age eight; concepts of diverse families, cultures, and communities; and what it takes to support optimal growth in the young. It offers the insights and information you could use to be effective throughout the field of early childhood education settings.

ASSOCIATE OF SCIENCE IN EARLY CHILDHOOD EDUCATION OFFERED ONLINE AND ON CAMPUS.

This program offers an understanding of the various characteristics that define learning capabilities in the very young as well as how to create curricular plans that promote self-esteem, social skills, and multi-cultural awareness. The core curriculum for the 60-credit-hour program covers early childhood studies, field opportunities, creative activities, children's literature, STEM, health, nutrition, safety, and more. Use this program to help develop the fundamentals you could use in early childhood education positions, or let it be the first step toward further education and training in a Bachelor of Science in Child Studies program at Post University.

Disclaimer: The Associate of Science in Early Childhood Education degree provides the opportunity to prepare learners to have a powerful impact on the lives of children, birth through age 8, and their families as early childhood educators. However, it is not a teacher certification preparation program for state licensure to teach in public schools in any state.
