

**POST UNIVERSITY  
SCHOOL OF ARTS & SCIENCE  
HYPERGUIDE**

## **WHAT IS A LIBRARY GUIDE?**

A library guide, also known as a pathfinder, is a reference sheet of one or two pages that helps kick-start a research project. By highlighting just a sampling of helpful websites, books, journals, media, and specific databases that are all related to your research topic and available through the library, a library guide can be an excellent resource for students.

## **WHAT IS A LIBRARY “HYPER” GUIDE?**

Post University’s Traurig Library developed these library hyper guides with our main campus and online students in mind. In addition to listing useful websites, books, journals, media, and databases for your course of study, we’ve also included **hyperlinks**! Use these links to navigate through the library guide; once you find a resource you like, ***just point and click!***

Post University’s library hyper guides provide “Table of Contents” links that take you directly to the discipline of your choice, “Helpful Websites” links that take you to useful webpages, “Databases” links that take you directly to the Blackboard login page (where you can access discipline-specific databases under the “Library” tab), and links that automatically take you into our library catalog to see if a book or DVD is available!

## **HOW DO I GET STARTED?**

Scroll down to the table of contents and click on the program/discipline of your choice. From there, you can browse the sampling of resources available under that program/discipline, and then click-through to use your selected resource!

Remember, if you need more resources or any library assistance (help with databases, research, APA/MLA citations, etc.) please feel free to ask a librarian at [Library@Post.edu](mailto:Library@Post.edu) or 203-596-4560.

Happy researching!
