BACHELOR OF SCIENCE IN BIOLOGY

STUDY THE SCIENCE OF LIFE WITH A DEGREE FROM POST UNIVERSTY!

The Bachelor of Science in Biology from Post University is designed to help you prepare for a future exploring the ins and outs of one of the most fundamental fields of science–learning about life. With the skills and knowledge this program has to offer, you could pursue opportunities in biological science, healthcare, and the biopharmaceutical industries. Or you may be able to use it to prepare for an advanced degree program in medicine, veterinary science, or pharmaceutical studies.*

BACHELOR OF SCIENCE IN BIOLOGY

OFFERED ONLINE AND ON CAMPUS.

In this comprehensive degree program in one of the most fundamental fields of science, you will have the opportunity to study the evolution, structure, and function of life. Coursework encourages the understanding and attainment of scientific skills and provides an essential introduction to subspecialities of the field, including molecular biology, microbiology, genetics, botany, anatomy, physiology, zoology, and ecology. Through studies in cell biology, biochemistry, physics, and genetics, this 120-credit hour program covers biological functions, the scientific process, quantitative reasoning, modeling and simulation, conventions, and terminology for scientific communication, and more.

** From medical to veterinary to pharmaceutical studies, every graduate school and program is unique and may require requirements for admission not covered in our degree program. It is ultimately the responsibility of each student to understand and fulfill the admission requirements for their desired program. Post University does not guarantee admittance for graduate programs of any kind with any other school, university, or educational organization.*
