COMPUTER INFORMATION SYSTEMS

START YOUR HIGH-TECH CAREER OFF RIGHT!

The Bachelor of Science in Computer Information Systems from Post University offers the insights, tools, skills, and credential you need to pursue a career in the high-tech field of computer systems. In this program, you could have the opportunity to gain a deeper understanding of information, networks, programming, and systems–the knowledgebase you need to pursue a career in IT and more.

Bachelor of Science in Computer Information Systems

Offered online and on campus

This comprehensive program combines three distinct disciplines–technology, computer science, and business–to help you build the essential skills you could use to seek success in a number of high-tech careers. The core curriculum for your 120-credit-hour program covers information technology, project management, programming principles, IT security, networking in business, and more. These courses could help lay the foundation for one of four concentration options you will use to customize your education to your goals. Concentrations include:

- **General Computer Information Systems**
- **Cybersecurity**
- **Networking**
- **Software Development**
