MASTER OF SCIENCE IN PROJECT MANAGEMENT

PURSUE PROJECT MANAGEMENT OPPORTUNITIES WITH A MASTER'S FROM POST UNIVERSITY!

The Master of Science in Project Management is designed to help you develop or enhance relevant project management skills for risk management, financial assessment, resource allocation, and quality management. With the skills and knowledge this program has to offer, you could pursue project management opportunities or relevant certifications.

MASTER OF SCIENCE IN PROJECT MANAGEMENT - *ONLINE ONLY*

This 100% online graduate degree program covers the principles and tools used in the real world to manage the process from idea to completed project. Coursework explores what it takes to balance resources, meet deadlines, and achieve results –from designing project plans to leading project teams. It covers defining goals, managing timelines, liaising with stakeholders, and more. Your 30-credit-hour graduate program could also help you build professionals skills in critical thinking, communication, and decision-making.

Post University is a Registered Educational Provider for the Project Management Institute (PMI). That status, as well as this program's full alignment to PMI's ten core knowledge areas, could help you fulfill the educational requirements for the Project Management Professional (PMP) or Professional Scrum Master (PSM) examinations.

Disclaimer: Post does not speak for any licensing board or body, nor do we guarantee certification. There are requirements outside of education for PMP or PSM certification. You are responsible for ensuring all requirements are met for certification.
